Career Objective

Computer Science undergraduate seeking Software Engineering opportunities, with strong foundations in Data Structures and Algorithms, Object-Oriented Programming, databases, and backend development. Hands-on experience building full-stack web applications, machine learning systems, REST APIs, and RAG-based AI solutions.

Education

Pranveer Singh Institute of Technology (PSIT), Kanpur	2024 – 2028
<i>B.Tech. in Computer Science and Engineering</i>	<i>CGPA: 8.79/10</i>

Wendy Academy High School	2024
ISC (Class XII) 93% overall Computer Science: 97/100	

Wendy Academy High School	2022
ICSE (Class X) 89.8% overall Computer Science: 97/100	

Projects

DeltaRAG — Documentation Change Impact Analysis | [GitHub](#)

Python, RAG, LangChain, ChromaDB, Sentence Transformers, Ollama, FastAPI, React, Docker

- **Developed** a documentation change-impact analysis system to identify potentially affected technical documents and sections across interconnected documentation.
- **Implemented** document ingestion, chunking, embeddings, vector indexing, and semantic search using Sentence Transformers and ChromaDB for evidence retrieval.
- **Integrated** LangChain with an Ollama-hosted open-source LLM and exposed the analysis workflow through FastAPI and a React interface.

Credit Risk Assessment System | [GitHub](#)

Python, Pandas, NumPy, Scikit-learn, SHAP, FastAPI

- **Developed** an end-to-end machine learning system for loan default risk assessment using applicant and loan attributes.
- **Implemented** preprocessing, feature engineering, model training and evaluation, probability-based prediction, risk classification, and SHAP-based model explainability with a FastAPI REST API.

ExamShelf — Academic Resource Platform | [GitHub](#) | [Live](#)

Next.js, React.js, Tailwind CSS, Supabase, PostgreSQL, Vercel

- **Developed** a web platform for organizing and delivering academic notes and previous-year question resources, serving **400+** logged-in users.
- **Implemented** resource management with Supabase database and cloud storage, row-level security policies, and responsive interfaces using Next.js and React.js.

Technical Skills

Languages: Java, Python, JavaScript, SQL

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Frontend: HTML, CSS, React.js, Next.js, Tailwind CSS

Backend: Node.js, FastAPI, REST APIs

AI/ML & GenAI: Machine Learning, Scikit-learn, Pandas, NumPy, Matplotlib, SHAP, RAG, Semantic Search, Embeddings, LangChain, ChromaDB, LLMs

Databases & Cloud: MySQL, Firebase/Firestore, Supabase, PostgreSQL, AWS, Vercel

Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Docker

Achievements & Leadership

- **LeetCode:** Solved 500+ problems; Contest Rating: 1670+.
- **Tech Expo – Student Project Exhibition 2025:** Secured 6th position among 150 teams for a Smart Drainage Monitoring System; project was featured in a newspaper.
- **AWS Student Builder Group, PSIT:** Technical Lead – Community Developer Sep 2026 – Present
 - **Lead** community activities across social channels, **guide** members, and **deliver** technical guidance during technical events.

Certifications

- **AWS Cloud Solutions Architect** — Coursera / AWS | [Link](#)
- **Agentic AI Certified Foundations Associate** — Oracle | [Link](#)
- **AWS Academy Machine Learning Foundations** — AWS | [Link](#)
